NOTES:

1. SMR = Sites and Monuments Record SAM = Scheduled Ancient Movement
2. AHAP = Area of High Archaeological Potential
3. On occasions the same area may contain more than one of the above sites.
4. Churches and churchyards are included for their archaeological potential.
5. For Areas of High Archaeological Potential occurring in the historic centres of Staines, Ashford, Laleham, Littleton, Shepperton, Stanwell and Sunbury, refer also to the Proposals Map. These areas may include sites entered separately on the SMR and not noted separately above. This is particularly the case for Staines, where many individual sites have produced evidence for Mesolithic, Neolithic, Bronze Age, Iron Age, Romano-British, Saxon and medieval occupation.
6. Crop marks are sites identified from aerial photographs.

7. A number of sites have been included which may have been partly destroyed, for instance by gravel extraction. The extent of remaining archaeological interest will need to be checked carefully if development is proposed.
