

At Last! A NEW FORM OF HEATING FROM GERMANY

Simple to install, Powerful, and no more servicing - EVER!

In Germany and Austria it can get as low as -20, even -30°C and a single snowfall can be as much as 3ft or more overnight. To deal with this severe cold they need powerful heating able to cope with sub zero temperatures and sudden climate change. They need excellent control and above all - low running costs without the need for constant servicing and replacement parts.

Bus to Town this winter?!

The solution, incredibly... is electric! This incredible heating could be the answer to help beat ever increasing energy costs and amazingly, it is not gas or oil, or solid fuel - but clean electric! All you need is standard supply and NO special tariff like economy 7.

All over Europe more people are choosing to heat their homes and offices with this very special form of electric heating in preference to oil gas or E7. In our area, more and more of our customers are making that same decision and when you see this incredible heating for yourself you could be next!

The heating looks just like conventional radiators, but STOP! it is very different! Put simply, that clunky central heating boiler needing constant servicing and replacement parts isn't the only choice anymore!

Now you can heat your homes, offices, extensions or conservatories with these incredible heaters providing individual control over every room without the need for a central control or wasted boiler space. This incredible German heating simply plugs in! Job Done! You can do just one room or the whole house! This heating, whilst quite NEW in the UK has been mainstream for a very long time in Germany and Austria.

Sunflow Ltd. offer a complete solution which can include disposing of your old central heating system, even oil tanks! Discover for yourself this incredible German heating.
